

## **This Week's theme is Planting and Growing:**

**Creative:**

**Paint your garden:** Make a few snips along the length of one end of a toilet paper tube. Press it down to make it look like a flower. The children can dip that end of the tube in paint and make flower prints on paper.

**Science and sensory:**

Collect a few flowers from the backyard. Place one flower in each compartment of the ice-tray, pour colored water ( mix water color paint or food coloring to water) over it and freeze it for a couple of hours. Take it out and melt one ice cube at a time and have the children guess what color flower will come out of the ice cube.
